

Merry Christmas and Happy New Year from all of us at
Pulaski Warehouse, Inc.!!

Enclosed you will find our 2024 seed program. Please
order early for the best pricing and opportunity to get the seed
varieties you would like.

If you are looking for a custom blend, that is our specialty.
Please call for a quote on hay & pasture, cover crop, food plot,
or any other seed mix.

NRCS mixes are another specialty of ours. Please call or
email us for a quote if you are planting any NRCS mixes
(Monarch, Bee Pollinator, or Native Plantings).

Prepay orders need to be paid by January 13th, 2024.
Bookings need to be ordered by January 27th, 2024, and picked
up or paid for by April 6th, 2024.

We thank you for your support over the years. Have a
Happy Holiday Season.

Pulaski Warehouse, Inc.
Andrea, John, Cheryl, & Aaron

PREPAY PROGRAM: Please fill out and return the order form by
January 13th, 2024.

BOOKING PROGRAM: Please fill out and return the order form
by January 27th, 2024.

Alfalfa Variety Characteristics

| Variety | Disease Resistance | | | | | | | | | | | WS | RAC | RSR |
|------------|--------------------|-----|----|----|----|----|-----|-----|----|-----|-------|----|-----|-----|
| | FD | DRI | BW | VW | FW | AN | PRR | APH | PA | PLH | SC/SR | | | |
| Max- LH | 3 | 30 | HR | HR | HR | HR | HR | HR | HR | HR | NR | VH | F | 1 |
| Max-DR | 3 | 30 | HR | HR | HR | HR | HR | HR | HR | HR | R | VH | F | 1 |
| Dura-Leaf+ | 4 | 30 | HR | HR | HR | HR | HR | HR | HR | MR | R | VH | F | 1 |
| Super C318 | 3 | 28 | HR | R | HR | HR | HR | R | R | MR | NR | VH | F | 1 |
| Vernal | 2 | 10 | R | - | MR | S | S | - | S | - | - | H | S | 4 |

FD – Fall Dormancy 1=Most Dormant 9=Least Dormant

DRI – Disease Resistance Index 30=Highest 6=Lowest

BW – Bacterial Wilt

VW – Verticillium Wilt

FW – Fusarium Wilt

AN – Anthracnose

PRR – Phytophthora Root Rot

APH – Aphananomyces Race 1

PA – Pea Aphid

PLH-Potato Leaf Hopper

SC/SR-Sclerotinia Crown & Stem Rot Resistance class (HR-Highly Resistant, R-Resistant, MR-Moderate Resistant, LR-Low Resistant, S-Susceptible, NR-Not Rated)

WS-Winter Survival – (VH-Very Hardy, H-Hardy, MH-Moderate Hardy, M-Moderate)

RAC-Recovery after Cutting – (VF-Very Fast, F-Fast, S-Slow)

RSR-Recommended Stand Rotation – (1-Long Rotation, 5-Short Rotation)

MAX-LH - Maximum Leafhopper Resistance. MAX-LH is the newest generation of potato leafhopper resistant alfalfas. According to data from the University of Wisconsin studies, a correlation was found between using glandular haired alfalfas and improved dry matter intake, rate of digestion, and milk production. Combine these advantages with MAX-LH's superior relative feed values in sprayed and unsprayed condition, and you have an alfalfa with unmatched potential. Superior relative feed value.

MAX-DR – Maximum Disease Resistance. This is a multi-leaf alfalfa with excellent yield and forage quality. This productive variety features high yield potential combined with excellent winter hardiness and persistence. MAX-DR alfalfa delivers consistent performance under a wide range of climatic and growing conditions. MAX-DR is highly resistant to all major alfalfa diseases that can reduce your yields and stand life. As an added bonus, breeders developed it to have high forage quality by utilizing parent plants selected for high relative feed value.

DURA-LEAF+ - A multi-leaf alfalfa with excellent yield and forage quality. This productive variety is highly resistant to all major disease pests and offers resistance to Sclerotinia crown and stem rot. DURA-LEAF+ is also resistant to pea aphid and stem nematode and displays excellent tolerance to lepto leaf spot and spring black stem. This exceptional variety scored a perfect 30/30 on the Wisconsin Disease Index. Adapted for hay, haylage, or grazing purposes throughout the Midwest, DURA-LEAF+ delivers consistent performance under a wide range of climate and soil conditions. Characteristics include superior establishment, excellent persistence, fast recovery, and exceptional winter hardiness.

SUPER C318 – This variety has a superior winter survival ranking. Highly resistant to major alfalfa diseases, a great yielding alfalfa also ranks among the top varieties in university forage quality and milk production per acre trials. This dual purpose alfalfa is good for conventional hay production and grazing. Its remarkable stand and persistence permits rotational continuous grazing.

PLANT HEIGHT / EAR HEIGHT: S = Short, MS = Medium Short, M = Medium, MT = Medium Tall, T = Tall, MH = Medium-High

Roundup Ready® Corn 2 contains in-plant tolerance to Roundup® brand herbicides, enabling growers to spray Roundup® brands over the top, from planting through the V8 stage or 30-inch corn height, with excellent crop safety and no yield reduction. Compared to popular conventional corn programs, the Roundup Ready® Corn 2 system costs less, while allowing hybrids to reach their maximum yield potential. While the U.S. regulatory agencies have given full approval to Roundup Ready® Corn 2 for commerce in the U.S. for marketing and consumption as food, food ingredients and feed for livestock, certain regulatory approvals are pending in certain export markets. For more information on these approvals, or for assistance in locating domestic grain outlets, see the American Seed Trade Association web site (www.amseed.org) or contact Monsanto directly at 800-768-6387.

Hybrids with the **Agrisure® GT** trait provide excellent tolerance to in-crop applications of glyphosate-based herbicides.

The **Agrisure® Above** trait stack offers the convenience of an integrated E-Z Refuge® seed blend plus multiple modes of action against corn borer, as well as suppression of earfeeding insects.

The **Agrisure Viptera® 3110A** trait stack delivers above-ground insect control for increased yield potential and higher quality grain. It is ideal for areas where rootworm management is not a key focus. Hybrids with the Agrisure Viptera 3110A trait stack feature the benefits of Agrisure Artesian® hybrids, which optimize the conversion of water to grain.

VT Double PRO® is the first double-stacked corn trait that requires just 20% separate, structure refuge. Dual modes of action provide maximum protection against corn earworm and other above-ground pests, like European and Southwestern corn borers and fall armyworm.

Genuity® SmartStax® RIB Complete® Corn Blend is a mix of 95% Bt. traited, 5% refuge seed. You get all the benefits of Genuity® SmartStax® technology, plus the convenience of 5% refuge seed interspersed in every bag. It has proven to have a 10 bu/A advantage over non-Bt. traited corn and a 20 bu/A advantage over non-Bt. treated corn + a soil-applied insecticide.

* In moderate to high rootworm pressure situations, Genuity® SmartStax® RIB Complete® corn blend products provided a 20 bu/acre advantage over products without Bt. corn rootworm protection and a 10 bu/acre advantage over products without Bt. corn rootworm protection used in combination with a soil-applied insecticide. TD Sites in IL, IA, KS, CO, NE, WI, MI, IN, MN, SD, OH, DE (2010-2013)100-112RM; N = 46 protocol site years under moderate and high CRW pressure. Moderate Pressure = untreated check averaged > 0.5-1.0. High Pressure = locations where untreated check averaged > 1.0

Genuity® Roundup Ready 2 Yield® soybeans have demonstrated a clear yield advantage: They yield an average 4.5 Bu/A advantage over original Round Ready soybeans. Studies show that Roundup Ready 2 Yield soybeans develop greater root biomass, more nodes on the main stem and larger shoot biomass than original Roundup Ready® soybean products.

Enlist E3™ soybeans provide tolerance to new 2,4-D choline, glyphosate and glufosinate.™Trademarks of Dow AgroSciences or DuPont, and their affiliated companies or their respective owners. Enlist E3 soybeans were jointly developed by Dow AgroSciences and M.S. Technologies, L.L.C.

BAYER/MONSANTO Trait Products are available in the ProHarvest Brand

SOYBEAN PIRACY STATEMENT

Seeds containing the Genuity® Roundup Ready 2 Yield® or the Roundup Ready 2 Xtend® traits can only be used to plant a single commercial crop. It is unlawful to save or replant Genuity® Roundup Ready 2 Yield® or the Roundup Ready 2 Xtend® soybeans. Additional information and limitations on the use of these products are provided in the Monsanto Technology Stewardship Agreement, the Monsanto Technology Use Guide, and 2016 Technology Use Guide Addendum to include Roundup Ready 2 Xtend® Soybeans. U.S. Patents for Monsanto technologies can be found at the following web page: <http://www.monsantotechnology.com>

Pro Harvest Characteristics - See enclosed Brunner Brochure.

Seed Containing The Roundup Ready Gene Cannot Be Saved For Replanting. All Roundup Ready soybeans are protected under U.S. patents. Saving Roundup Ready soybean seed for replanting is a violation of these patents and is illegal. Seed piracy also hinders the development of future technologies and their benefits for the soybean industry. A person who helps a grower save Roundup Ready soybean seed for replanting is also infringing the patents and is contributing to violation of the terms under which the seed was sold.

Pulaski Warehouse, Inc.

Who We Are

FOR MORE THAN 30 YEARS,
WE AT NUTRAMELK HAVE
BEEN MANUFACTURING
HIGH QUALITY
MILK REPLACER PRODUCTS
FOR YOUNG ANIMALS.

At NUTRAMELK, we are committed to you, our customer and future customers, to produce and provide the best quality milk replacers and service available to those who raise or service the young animal industry.

How We Do It

**WE START WITH RESEARCH,
IT'S THAT SIMPLE.**

At NUTRAMELK, we source only the best quality ingredients available to our industry. All ingredients are tested and approved before being released into the production facility.

Our nutritionists formulate our diets for optimum growth and development.

Production employees blend the ingredients in our specialized plant to produce the desired milk replacer. Whether it is for calves, lambs, kids, piglets or foals, extreme care and pride are taken in the formulation, blending, packaging and marketing of these products. Our technical staff conducts ongoing feed trials in our own research facilities. We feed thousands of calves every year and you can be assured the desired results will be achieved.

Our team of experienced professionals will assist you and your customers in selecting the products that are best suited for you and your customers' needs. Our experience will translate into increased profitability by enhancing the health and well-being of the animals utilizing our products.

What We Can Do For You

Whatever type of livestock you raise, if it drinks milk or milk replacer, we have a product to suit your every requirement. From our all milk formulas, or through a blend of milk, plasma and wheat proteins, we have a solution for your milk replacer needs.

Whether you choose one of our formulas or if you decide to use one of your own we would be happy to discuss your milk replacer needs with you. Our sales and service staff are only a phone call away.

Prices subject to change with the fertilizer market

\$100 Combo Package Deal

Purchase one - 2.5 gallon LIQUID CARBON and one 2.5 gallon of one of the following items:

AGRI-N, AGRI-SWEET, K28, MICROHANCE, SULFUR, SUGEXD

Micronutrients

Monty's secondary and micronutrients are designed to supplement traditional nutrient management programs and to assist in addressing specific micronutrient deficiencies. Each formula is designed to overcome specific plant stresses associated with nutrient uptake. By applying these foliar or soil applied micronutrients you can address deficiencies rapidly to speed recovery and reduce yield drag. Suggested Rate 1 to 2 quarts per acre

2.5 GALLON: \$85.38

SALE PRICE: \$81.00

1) Quality/Health of forage 2) Increase tonnage 3) Build soil health and 4) Cost efficient

CORN AND SOYBEAN MANAGEMENT PROGRAM

Apply 1 to 2 quarts of SURGE XD and 1 to 2 quarts of NAUXIN at R1 -R2 stage.

REGULAR PRICE: \$106.00

SALE PRICE: \$100.00

HAY AND PASTURE MANAGEMENT PROGRAM

Apply 1 to 2 quarts of LIQUID CARBON and 1 to 2 quarts of HAY-NOW after each cutting (4 to 6 inch of regrowth) and when putting field to bed.

REGULAR PRICE: \$120.51

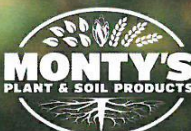

SALE PRICE: \$105.00

SALES PRICES GOOD THRU APRIL 15, 2024

Must Order & pay Before April 15, 2024

PRODUCT AVAILABLE IN 30 GALLON AND 275 GALLON TOTES

Prices subject to change with the fertilizer market

Monty's Plant Food Company offers natural soil enhancement and plant fertility products using innovative proprietary technologies for growers around the world – in the agriculture, horticulture, lawn and garden, and turf industries. Monty's products work on all soil types and planting conditions. Monty's products are tank-mix flexible and are ideal for all crops including corn, wheat, soybeans, specialty crops, and forages.

THE MONTY'S® EDGE

Monty's understands the right ratio of humic substances that maximize plant growth. Our engineered humic product stimulates all three soil health properties—biologic, chemical, and geological—causing dramatic differences in soil, roots, and crops. Monty's understands the importance of that relationship and how it impacts the success of the plant's growth. **THIS is the Monty's edge!**

Soil Amendment

LIQUID CARBON™

- Reduces soil compaction
- Improves overall soil health
- Enhances micro nutrient uptake
- Enhances breakdown of plant residue
- Tank mix flexibility for year round use
- Suggested Rate: 32 oz to 64 oz per acre

2.5 GALLON: \$60.88

SALE PRICE: \$57.00

30 GALLON DRUM: \$672.60

SALE PRICE: \$640.00

DRI CARBON

- Same benefits of Monty's Liquid Carbon in a granulated product
- Enhances micro-nutrient uptake
- Improves soil moisture retention
- Catalyst for microbial activity
- Ready soluble with water
- Apply: 10 lbs per acre. Can be applied with dry fertilizer

50 LBS: \$60

SALE PRICE: \$57.00

2,000 LBS TOTE: \$2,200

SALE PRICE: \$2,095.00

MONTY'S HUMIC DIFFERENCE

Maximizing soil performance

The impact of humics on the soil...

BIOLOGICAL

Living organisms in the soil

Increased Biological Activity

- Serves as a food source for microbes
- Converts and releases nutrients
- Builds organic matter and humus
- Better seed germination
- Early root development
- Healthier soils

GEOLOGICAL

Soil structure (sand, silt, clay)

Increased Geological Activity

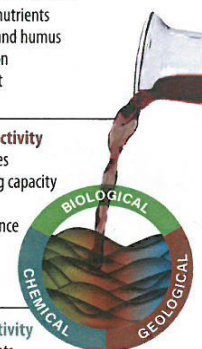

- Mineralizes soil particles
- Increases water holding capacity
- Reduces compaction
- Easier tillage performance
- Reduces soil loss
- Stronger plants
- Improves soil porosity

CHEMICAL

Interaction of soil nutrients & micronutrients

Increased Chemical Activity

- Unlocks tied-up nutrients
- Improves Cation Exchange Capacity
- Converts raw fertilizer to plant food
- Increased fertilizer efficiency
- Higher yields

Fertility Over the top applications designed to be used in conjunction with current nutrient management plan. Suggested Rate: 16 oz to 32 oz per acre

| | | REG. PRICE | SALE PRICE |
|--|--|----------------------|-----------------|
| SEED STARTER/FOLIAR 4-15-12 | • Ideal for quick emergence and early season vigor | 2.5 GAL \$75.00 | \$71.00 |
| | | 30 GAL DRUM \$840.00 | \$800.00 |
| ALL PURPOSE GROWTH 8-16-8 | • Ideal for vigorous plant growth and crop stress management | 2.5 GAL \$75.00 | \$71.00 |
| | | 30 GAL DRUM \$840.00 | \$800.00 |
| ROOT & BLOOM 2-15-15 | • Ideal for application during reproductive/bloom stages | 2.5 GAL \$75.00 | \$71.00 |
| | | 30 GAL DRUM \$840.00 | \$800.00 |
| AGRI-N | • Natural product that provides nitrogen for green-up | 2.5 GAL \$46.50 | \$44.00 |
| | • Quick plant energy | 30 GAL DRUM \$497.00 | \$473.00 |

HAY NOW 7-9-5

- Works on grasses and legumes
- Enhances growth and root development
- Helps during periods of stress to maximize production
- N, P, K, with Sulfur, Iron, and Zinc

| | REG. PRICE | SALE PRICE |
|-------------|------------|-----------------|
| 2.5 GAL | \$59.63 | \$56.00 |
| 30 GAL DRUM | \$657.60 | \$626.00 |

C795 7-9-5

- Concentrated, versatile liquid plant food with NPK and other essential nutrients for any crop.

| | | |
|-------------|----------|-----------------|
| 2.5 GAL | \$59.63 | \$56.00 |
| 30 GAL DRUM | \$657.60 | \$626.00 |

NAUXIN™

- Provide nitrogen to enhance growth and green-up
- Apply to any crop, at any stage of growth

| | | |
|-------------|----------|-----------------|
| 2.5 GAL | \$58.00 | \$55.00 |
| 30 GAL DRUM | \$574.10 | \$546.00 |

SPECIALTY

Designed to address specific issues or needs.

SURGE XD

- Designed to enhance nutrient uptake into the plant
- Works as a chelator for nutrients

| | | |
|---------|---------|----------------|
| 2.5 GAL | \$48.00 | \$45.00 |
|---------|---------|----------------|

AGRI-SWEET FG

- Provide nitrogen to enhance growth and green-up
- Apply to any crop, at any stage of growth

| | | |
|-------------|----------|-----------------|
| 2.5 GAL | \$46.00 | \$43.00 |
| 30 GAL DRUM | \$491.00 | \$467.00 |
