

Season's Greetings from Pulaski Warehouse, Inc.!

Warmest wishes for a Merry Christmas and a Happy New Year from all of us at Pulaski Warehouse, Inc.!

Enclosed, you'll find our **2025 Seed Program**. We encourage you to order early to secure the best pricing and ensure availability of your preferred seed varieties.

Custom blends are our specialty! Whether it's hay and pasture, cover crops, food plots, or any other seed mix, we're here to help. Contact us today for a quote tailored to your needs.

We also specialize in NRCS mixes, including Monarch, Bee Pollinator, and Native Plantings. Feel free to call or email us for a quote on these or other mixes.

We sincerely appreciate your continued support and partnership. Wishing you and your loved ones a joyous holiday season!

Pulaski Warehouse, Inc.
Andrea, John, Cheryl, & Aaron

Prepay Program: Submit your order form with payment by **January 18, 2025**.

Booking Program: Orders must be placed by **January 31, 2025**, and picked up or paid for by **April 5, 2025**

Please note that prices are subject to change.

TONDRA MAX

A Brand Developed for Reliability

TONDRA MAX brand is an alfalfa that exhibits Strong Yield, Quality, and Persistence data. A very recognizable alfalfa with a rich dark green color. TONDRA MAX will give top Hay Producers a choice that provides them with great yield and quality. Truly an alfalfa brand for long term stands.

Alfalfa Variety Characteristics

Variety	Disease Resistance											WS	RAC	RSR	
	FD	DRI	BW	VW	FW	AN	PRR	APH	PA	PLH	SC/SR				
Max- LH	3	30	HR	HR	HR	HR	HR	HR	HR	HR	HR	NR	VH	F	1
Dura-Leaf+	4	30	HR	HR	HR	HR	HR	HR	HR	HR	MR	R	VH	F	1
Super C318	3	28	HR	R	HR	HR	HR	R	R	R	MR	NR	VH	F	1
Hardy Northern	2	10	R	-	MR	S	S	-	S	-	-	-	H	S	4

FD – Fall Dormancy 1=Most Dormant 9=Least Dormant

DRI – Disease Resistance Index 30=Highest 6=Lowest

BW – Bacterial Wilt

VW – Verticillium Wilt

FW – Fusarium Wilt

AN – Anthracnose

PRR – Phytophthora Root Rot

APH – Aphananpmyces Race 1

PA – Pea Aphid

PLH-Potato Leaf Hopper

SC/SR-Sclerotinia Crown & Stem Rot Resistance class (HR-Highly Resistant, R-Resistant, MR-Moderate Resistant, LR-Low Resistant, S-Susceptible, NR-Not Rated)

WS-Winter Survival – (VH-Very Hardy, H-Hardy, MH-Moderate Hardy, M-Moderate)

RAC-Recovery after Cutting – (VF-Very Fast, F-Fast, S-Slow)

RSR-Recommended Stand Rotation – (1-Long Rotation, 5-Short Rotation)

MAX-LH - Maximum Leafhopper Resistance. MAX-LH is the newest generation of potato leafhopper resistant alfalfas. According to data from the University of Wisconsin studies, a correlation was found between using glandular haired alfalfas and improved dry matter intake, rate of digestion, and milk production. Combine these advantages with MAX-LH's superior relative feed values in sprayed and unsprayed condition, and you have an alfalfa with unmatched potential. Superior relative feed value.

DURA-LEAF+ - A multi-leaf alfalfa with excellent yield and forage quality. This productive variety is highly resistant to all major disease pests and offers resistance to Sclerotinia crown and stem rot. DURA-LEAF+ is also resistant to pea aphid and stem nematode and displays excellent tolerance to lepto leaf spot and spring black stem. This exceptional variety scored a perfect 30/30 on the Wisconsin Disease Index. Adapted for hay, haylage, or grazing purposes throughout the Midwest, DURA-LEAF+ delivers consistent performance under a wide range of climate and soil conditions. Characteristics include superior establishment, excellent persistence, fast recovery, and exceptional winter hardiness.

SUPER C318 – This variety has a superior winter survival ranking. Highly resistant to major alfalfa diseases, a great yielding alfalfa also ranks among the top varieties in university forage quality and milk production per acre trials. This dual purpose alfalfa is good for conventional hay production and grazing. Its remarkable stand and persistence permits rotational continuous grazing.

PLANT HEIGHT / EAR HEIGHT: S = Short, MS = Medium Short, M = Medium, MT = Medium Tall, T = Tall, MH = Medium-High

Roundup Ready® Corn 2 contains in-plant tolerance to Roundup® brand herbicides, enabling growers to spray Roundup® brands over the top, from planting through the V8 stage or 30-inch corn height, with excellent crop safety and no yield reduction. Compared to popular conventional corn programs, the Roundup Ready® Corn 2 system costs less, while allowing hybrids to reach their maximum yield potential. While the U.S. regulatory agencies have given full approval to Roundup Ready® Corn 2 for commerce in the U.S. for marketing and consumption as food, food ingredients and feed for livestock, certain regulatory approvals are pending in certain export markets. For more information on these approvals, or for assistance in locating domestic grain outlets, see the American Seed Trade Association web site (www.amseed.org) or contact Monsanto directly at 800-768-6387.

Viptera is the most comprehensive above-ground insect control with the convenience of an integrated E-Z Refuge® seed blend.

Hybrids with the **Agrisure® GT** trait provide excellent tolerance to in-crop applications of glyphosate-based herbicides.

The **Agrisure® Above** trait stack offers the convenience of an integrated E-Z Refuge® seed blend plus multiple modes of action against corn borer, as well as suppression of earfeeding insects.

The **Agrisure Viptera® 3110A** trait stack delivers above-ground insect control for increased yield potential and higher quality grain. It is ideal for areas where rootworm management is not a key focus. Hybrids with the Agrisure Viptera 3110A trait stack feature the benefits of Agrisure Artesian® hybrids, which optimize the conversion of water to grain.

VT Double PRO® is the first double-stacked corn trait that requires just 20% separate, structure refuge. Dual modes of action provide maximum protection against corn earworm and other above-ground pests, like European and Southwestern corn borers and fall armyworm.

Genuity® SmartStax® RIB Complete® Corn Blend is a mix of 95% Bt. traited, 5% refuge seed. You get all the benefits of Genuity® SmartStax® technology, plus the convenience of 5% refuge seed interspersed in every bag. It has proven to have a 10 bu/A advantage over non-Bt. traited corn and a 20 bu/A advantage over non-Bt. treated corn + a soil-applied insecticide.

* In moderate to high rootworm pressure situations, Genuity® SmartStax® RIB Complete® corn blend products provided a 20 bu/acre advantage over products without Bt corn rootworm protection and a 10 bu/acre advantage over products without Bt corn rootworm protection used in combination with a soil-applied insecticide. TD Sites in IL, IA, KS, CO, NE, WI, MI, IN, MN, SD, OH, DE (2010-2013)100-112RM; N = 46 protocol site years under moderate and high CRW pressure. Moderate Pressure = untreated check averaged > 0.5-1.0. High Pressure = locations where untreated check averaged > 1.0

Duracade provides multiple modes of action against corn rootworm and corn borer, as well as suppression of ear-feeding insects. Includes a novel, alternate mode of action for corn rootworm to help preserve trait durability and delay insect adaptation for long-term field health. Always provides a five percent E-Z Refuge®

Genuity® Roundup Ready 2 Yield® soybeans have demonstrated a clear yield advantage: They yield an average 4.5 Bu/A advantage over original Round Ready soybeans. Studies show that Roundup Ready 2 Yield soybeans develop greater root biomass, more nodes on the main stem and larger shoot biomass than original Roundup Ready® soybean products.

Enlist E3™ soybeans provide tolerance to new 2,4-D choline, glyphosate and glufosinate. ™Trademarks of Dow AgroSciences or DuPont, and their affiliated companies or their respective owners. Enlist E3 soybeans were jointly developed by Dow AgroSciences and M.S. Technologies, L.L.C.

BAYER/MONSANTO Traitied Products are available in the ProHarvest Brand

SOYBEAN PIRACY STATEMENT

Seeds containing the Genuity® Roundup Ready 2 Yield® or the Roundup Ready 2 Xtend® traits can only be used to plant a single commercial crop. It is unlawful to save or replant Genuity® Roundup Ready 2 Yield® or the Roundup Ready 2 Xtend® soybeans. Additional information and limitations on the use of these products are provided in the Monsanto Technology Stewardship Agreement, the Monsanto Technology Use Guide, and 2016 Technology Use Guide Addendum to include Roundup Ready 2 Xtend® Soybeans. U.S. Patents for Monsanto technologies can be found at the following web page: <http://www.monsantotechnology.com>

Pro Harvest Characteristics - See enclosed Brunner Brochure.

Seed Containing The Roundup Ready Gene Cannot Be Saved For Replanting. All Roundup Ready soybeans are protected under U.S. patents. Saving Roundup Ready soybean seed for replanting is a violation of these patents and is illegal. Seed piracy also hinders the development of future technologies and their benefits for the soybean industry. A person who helps a grower save Roundup Ready soybean seed for replanting is also infringing the patents and is contributing to violation of the terms under which the seed was sold.

Pulacki Warehouse, Inc.

Who We Are

FOR MORE THAN 30 YEARS, WE AT NUTRAMELK HAVE BEEN MANUFACTURING HIGH QUALITY MILK REPLACER PRODUCTS FOR YOUNG ANIMALS.

At NUTRAMELK, we are committed to you, our customer and future customers, to produce and provide the best quality milk replacers and service available to those who raise or service the young animal industry.

How We Do It

WE START WITH RESEARCH, IT'S THAT SIMPLE.

At NUTRAMELK, we source only the best quality ingredients available to our industry. All ingredients are tested and approved before being released into the production facility.

Our nutritionists formulate our diets for optimum growth and development.

Production employees blend the ingredients in our specialized plant to produce the desired milk replacer. Whether it is for calves, lambs, kids, piglets or foals, extreme care and pride are taken in the formulation, blending, packaging and marketing of these products. Our technical staff conducts ongoing feed trials in our own research facilities. We feed thousands of calves every year and you can be assured the desired results will be achieved.

Our team of experienced professionals will assist you and your customers in selecting the products that are best suited for you and your customers' needs. Our experience will translate into increased profitability by enhancing the health and well-being of the animals utilizing our products.

What We Can Do For You

Whatever type of livestock you raise, if it drinks milk or milk replacer, we have a product to suit your every requirement. From our all milk formulas, or through a blend of milk, plasma and wheat proteins, we have a solution for your milk replacer needs.

Whether you choose one of our formulas or if you decide to use one of your own we would be happy to discuss your milk replacer needs with you. Our sales and service staff are only a phone call away.

SPECIALTY Designed to address specific issues or needs.

SURGE XD

- Designed to enhance nutrient uptake into the plant
- Works as a chelator for nutrients

2.5 GAL \$52.00 **\$46.00**

AGRI-SWEET FG

- Provide nitrogen to enhance growth and green-up
- Apply to any crop, at any stage of growth

2.5 GAL \$49.00 **\$44.00**
30 GAL DRUM \$525.00 **\$470.00**

MULTIPLICITY

- Dry package of microbial strains
- Promotes early root development, plant stamina and overall health of crop
- Apply at rate of 1 teaspoon per acre
- 400 grams cover 40 acres

400 GRAMS \$256.00 **\$230.00**

Micronutrients

Monty's secondary and micronutrients are designed to supplement traditional nutrient management programs and to assist in addressing specific micronutrient deficiencies. Each formula is designed to overcome specific plant stresses associated with nutrient uptake. By applying these foliar or soil applied micronutrients you can address deficiencies rapidly to speed recovery and reduce yield drag. Suggested Rate 1 to 2 quarts per acre

2.5 GALLON: \$105.00

SALE PRICE: \$85.00

ZINC (ZN) 9%

2.5 GALLON: \$56.25

SALE PRICE: \$50.00

IRON (Fe)

2.5 GALLON: \$85.38

SALE PRICE: \$65.00

1) Quality/Health of forage 2) Increase tonnage 3) Build soil health and 4) Cost efficient

CORN AND SOYBEAN MANAGEMENT PROGRAM

Apply 1 to 2 quarts of SURGE XD and 1 to 2 quarts of NAUXIN at R1 -R2 stage.

HAY AND PASTURE MANAGEMENT PROGRAM

Apply 1 to 2 quarts of LIQUID CARBON and 1 to 2 quarts of HAY-NOW after each cutting (4 to 6 inch of regrowth) and when putting field to bed.

SALES PRICES GOOD THRU APRIL 15, 2025

www.montysplantfood.com

Monty's Plant Food Company offers natural soil enhancement and plant fertility products using innovative proprietary technologies for growers around the world – in the agriculture, horticulture, lawn and garden, and turf industries. Monty's products work on all soil types and planting conditions. Monty's products are tank-mix flexible and are ideal for all crops including corn, wheat, soybeans, specialty crops, and forages.

MONTY'S HUMIC DIFFERENCE

Maximizing soil performance

The impact of humics on the soil...

BIOLOGICAL Living organisms in the soil	Increased Biological Activity <ul style="list-style-type: none"> Serves as a food source for microbes Converts and releases nutrients Builds organic matter and humus Better seed germination Early root development Healthier soils
GEOLOGICAL Soil structure (sand, silt, clay)	Increased Geological Activity <ul style="list-style-type: none"> Mineralizes soil particles Increases water holding capacity Reduces compaction Easier tillage performance Reduces soil loss Stronger plants Improves soil porosity
CHEMICAL Interaction of soil nutrients & micronutrients	Increased Chemical Activity <ul style="list-style-type: none"> Unlocks tied-up nutrients Improves Cation Exchange Capacity Converts raw fertilizer to plant food Increased fertilizer efficiency Higher yields

THE MONTY'S® EDGE

Monty's understands the right ratio of humic substances that maximize plant growth.

Our engineered humic product stimulates all three soil health properties—biologic, chemical, and geological — causing dramatic differences in soil, roots, and crops.

Monty's understands the importance of that relationship and how it impacts the success of the plant's growth. **THIS is the Monty's edge!**

Prices subject to change with the fertilizer market

Soil Amendment

<p>LIQUID CARBON™</p> <ul style="list-style-type: none"> Reduces soil compaction Improves overall soil health Enhances micro nutrient uptake Enhances breakdown of plant residue Tank mix flexibility for year round use Suggested Rate: 32 oz to 64 oz per acre <p>2.5 GALLON: \$60.88 SALE PRICE: \$45.00</p> <p>30 GALLON DRUM: \$672.60 SALE PRICE: \$475.00</p>	<p>DRI CARBON</p> <ul style="list-style-type: none"> Same benefits of Monty's Liquid Carbon in a granulated product Enhances micro-nutrient uptake Improves soil moisture retention Catalyst for microbial activity Ready soluble with water Apply: 10 lbs per acre. Can be applied with dry fertilizer <p>50 LBS: \$60 SALE PRICE: \$55.00</p> <p>2,000 LBS TOTE: \$2,200 SALE PRICE: \$2,000.00</p>
---	--

Return On Investment increases with Monty's Liquid Carbon. Research shows Monty's Liquid Carbon can increase:

- Yields
- Nitrogen Uptake
- Phosphorus Uptake
- Plant Biomass

Putting more money in your pocket!

Fertility
Over the top applications designed to be used in conjunction with current nutrient management plan. Suggested Rate: 16 oz to 32 oz per acre

			REG. PRICE	SALE PRICE
SEED STARTER/FOLIAR 4-15-12	• Ideal for quick emergence and early season vigor	2.5 GAL	\$75.00	\$67.00
		30 GAL DRUM	\$840.00	\$750.00
ALL PURPOSE GROWTH 8-16-8	• Ideal for vigorous plant growth and crop stress management	2.5 GAL	\$75.00	\$67.00
		30 GAL DRUM	\$840.00	\$750.00
ROOT & BLOOM 2-15-15	• Ideal for application during reproductive/bloom stages	2.5 GAL	\$75.00	\$67.00
		30 GAL DRUM	\$840.00	\$775.00
AGRI-N	• Natural product that provides nitrogen for green-up	2.5 GAL	\$48.00	\$44.00
	• Quick plant energy	30 GAL DRUM	\$525.00	\$470.00
HAY NOW 7-9-5	• Works on grasses and legumes	2.5 GAL	\$48.00	\$43.00
	• Enhances growth and root development	30 GAL DRUM	\$657.60	\$500.00
C795 7-9-5	• Helps during periods of stress to maximize production	2.5 GAL	\$48.00	\$43.00
	• N, P, K, with Sulfur, Iron, and Zinc	30 GAL DRUM	\$657.60	\$500.00
C795 7-9-5	• Concentrated, versatile liquid plant food with NPK and other essential nutrients for any crop.	2.5 GAL	\$48.00	\$43.00
		30 GAL DRUM	\$657.60	\$500.00
NAUXIN™	• Provide nitrogen to enhance growth and green-up	2.5 GAL	\$58.00	\$53.00
	• Apply to any crop, at any stage of growth	30 GAL DRUM	\$574.10	\$525.00
